London Gems Trading Rules

| Accel Equity | 07-7-2025

LONDON SESSION TRADING RULES:

1. Wait for Protraction move which raids any of the Liquidity pools or rebalance of the imbalanced price range.
2. Then Wait for the Market structure shift and/or expansion in the direction as per the Institutional order flow (IOF).
3. Always use Discount and Premium dealing range to determine an entry stoploss & target profit level, strictly suggested for developing students Entry @ 61.8% Stoploss @ 100% and Take profit @ 0%
4. For Developing level Take Trades forming Between 1:00 am to 5:00am New York UTC-4.
5. During winters session time get changes by +1-hour UTC-5.
6. Avoid long and short setups when you experience a Relative/equal high and low around 100% or stoploss level.
7. Always prefer 5-15min time frame for taking setups.
8. Avoid taking long or short positions in the pair which is at its Monthly, Weekly, Daily High and Lows, market tend to consolidate or reverse around these levels.
9. Incorporate Events in your charts while doing the analysis, make sure to take the trades after data is released if there are any potential setups.
10. When market tend to expands rapidly with no protraction move, use second leg of expansion and retracement to FVG or 61.8% retracement level.
11. Incase second leg of the expansion has raided the liquidity avoid taking the setups because most likely objective is done.
12. Most Important: When Model 1 Setups appears between Equal High and Equal Low, strictly avoid the setup. Wait for one liquidity to be taken out and then frame the setup.
13. Do Not Trade XAUUSD or USDXAU pairs if Dollar index is consolidating, look for setups in cross pairs which is trending.
14. When in doubt where price is likely to run for wait for second leg of expansion when market is directionless.
15. Trade only clean price actions charts, Avoid choppy sideline charts.
16. Avoid trading Non-Farm Payroll and Day before NFP your experience will show you the difference.
17. Follow Top-down Approach analysis and annotate your charts and levels accordingly.
18. If the Initial Move is as per the IOF, we are not interested in the trade until we don't get protraction phase in chart.

London Gems Trading Rules

19. Look for imbalances in the chart in smaller timeframe after drawing the Fib so that we can determine the retracement up to a specific area.

20. Do watch and try to analyze setups for both directions and determine from where price is returning and making an attempt for which levels.

21. Learn to determine the Shallow runs, it could lead to raid of those levels again.

22. For any High Probability trade setups, we need to have a clear IOF. USE Market structure break on higher time frame and determine the opposite side liquidity pool or Imbalances

23. After raiding a higher timeframe liquidity pool still, we encounter equal high and equal low range and setup forming in between, Avoid those setups, wait for clear run.

24. When Price is overly extended without giving you any setups avoid taking trades for those session.

25. Whenever you found yourself within a trade which is violating any of the rules, if you get a chance to get out at breakeven, just get off or with little expense.

26. For clarity use intermarket analysis, using multi pairs with usdx they provide great clarity.

27. Avoid Setups on Bank Holidays specially America, Canada, Europe and United Kingdom.

28. Keep Eye and be alert around Institutional 00, 20, 50, 80's Levels.

29. Avoid a Pair to trade if it has multiples data releases in various times within a London Killzone time frame.

30. Avoid a chart which has large expansion with consolidation.

31. By Doing Intermarket analysis which provides strength to avoid a trade entry during expansion mode, which likely to fail, by watching other pair which have equal high and equal low, so wait for it to get raided and then wait for the setup to appear and enter, because most likely the primary one is likely to fail.

32. Accumulation, Manipulation & Distribution is the Business intraday.

33. Incorporate for spread for the Pairs which has wider spreads.
